## CEO and CFO Comments

Joey Wat, CEO of Yum China, commented, “We are pleased to have set new first quarter records for revenues and operating profit. I want to recognize all of our employees whose unwavering dedication has been instrumental in delivering this performance. We started the new year with low visibility into how conditions would unfold. The operating environment was fluid with lingering COVID outbreaks. Through our team’s hard work, scenario planning and laser focus to drive sales, we successfully capitalized on critical trading during the Chinese New Year (“CNY”) holiday period. Offering delicious food and superior value served us well. We added juicy whole chicken to KFC’s signature Golden Bucket to capture at-home consumption around family reunions. Creative twists to our classic Beef Wrap and Supreme Pizza delighted local taste buds. We also fueled traffic with compelling value promotions, including Crazy Thursday, weekday value combos and weekend buy-more-save-more.”

Wat continued, “Our performance was enabled by the execution of our RGM (Resilience-Growth-Moat) strategy over the past few years. Today, we are more agile and responsive to the dynamic operating environment. Our robust digital ecosystem has continued to unleash our capabilities in running the entire business, from customer engagement to restaurant operation and supply chain. By planning for multiple scenarios for CNY and incorporating regional variances, we were able to effectively deploy resources as opportunities arose. In addition, we enhanced labor productivity with innovative approaches such as management sharing across stores. As we progress through 2023, we plan to stay nimble to the evolving market conditions. At the same time, we will focus on building sales momentum, expanding our store network, and fortifying our competitive moat to position Yum China for sustainable growth.”

Andy Yeung, CFO of Yum China, added, “First quarter sales rebounded significantly year over year and sequentially. Our efforts to focus on driving sales were rewarded, as the country pivoted from strict COVID measures. Margins also improved substantially, benefitting from sales leveraging, cost structure rebasing, and temporary relief from the government and landlords. However, we are still in the early stages of recovery. Sales during the CNY trading period were buoyed by pent-up travel demand, yet same-store sales post-CNY have remained at teens level below 2019. Therefore, driving sales remains our top priority for this year. Consumers are looking for value, so value campaigns would be an important tool to drive store traffic and sales. On the cost side, we expect inflationary pressures to be gradually built-up and the benefit from temporary relief to be phased out over the coming quarters. The pace and the trajectory of the recovery remain uncertain, given the challenging macroeconomic conditions and the lingering effects of the pandemic. Nevertheless, we are confident that with vigorous scenario planning, more flexible cost structures and operational agilities, we can seize opportunities in good times and stay resilient in challenging times.”

In this press release:

- The Company provides certain percentage changes excluding the impact of foreign currency translation (“F/X”). These amounts are derived by translating current year results at prior year average exchange rates. We believe the elimination of the F/X impact provides better year-to-year comparability without the distortion of foreign currency fluctuations.
- System sales growth reflects the results of all restaurants regardless of ownership, including Company-owned, franchise and unconsolidated affiliate restaurants that operate our restaurant concepts, except for non-Company-owned restaurants for which we do not receive a sales-based royalty. Sales of franchise and unconsolidated affiliate restaurants typically generate ongoing franchise fees for the Company at an average rate of approximately 6% of system sales. Franchise and unconsolidated affiliate restaurant sales are not included in Company sales in the Condensed Consolidated Statements of Income; however, the franchise fees are included in the Company’s revenues. We believe system sales growth is useful to investors as a significant indicator of the overall strength of our business as it incorporates all of our revenue drivers, Company and franchise same-store sales as well as net unit growth.
- Effective January 1, 2018, the Company revised its definition of same-store sales growth to represent the estimated percentage change in sales of food of all restaurants in the Company system that have been open prior to the first day of our prior fiscal year, excluding the period during which stores are temporarily closed. We refer to these as our "base" stores. Previously, same-store sales growth represented the estimated percentage change in sales of all restaurants in the Company system that have been open for one year or more, including stores temporarily closed, and the base stores changed on a rolling basis from month to month. This revision was made to align with how management measures performance internally and focuses on trends of a more stable base of stores.
- Company sales represent revenues from Company-owned restaurants. Company Restaurant profit (“Restaurant profit”) is defined as Company sales less expenses incurred directly by our Company-owned restaurants in generating Company sales, including cost of food and paper, restaurant-level payroll and employee benefits, rent, depreciation and amortization of restaurant-level assets, advertising expenses, and other operating expenses. Company restaurant margin percentage is defined as Restaurant profit divided by Company sales.

**Reconciliation of Reported GAAP Results to Non-GAAP Adjusted Measures**  
**(in millions, except per share data)**  
**(unaudited)**

In addition to the results provided in accordance with U.S. Generally Accepted Accounting Principles (“GAAP”) in this press release, the Company provides non-GAAP measures adjusted for Special Items, which include Adjusted Operating Profit, Adjusted Net Income, Adjusted Earnings Per Common Share (“EPS”), Adjusted Effective Tax Rate and Adjusted EBITDA, which we define as net income including noncontrolling interests adjusted for equity in net earnings (losses) from equity method investments, income tax, interest income, net, investment gain or loss, certain non-cash expenses, consisting of depreciation and amortization as well as store impairment charges, and Special Items. We also use Restaurant profit and Restaurant margin (as defined above) for the purposes of internally evaluating the performance of our Company-owned restaurants and we believe Restaurant profit and Restaurant margin provide useful information to investors as to the profitability of our Company-owned restaurants.

The following table set forth the reconciliation of the most directly comparable GAAP financial measures to the non-GAAP adjusted financial measures. The reconciliation of GAAP Operating Profit to Restaurant Profit is presented in Segment Results within this release.

<sup>(1)</sup> In February 2020, the Company granted Partner PSU Awards to select employees who were deemed critical to the Company's execution of its strategic operating plan. These PSU awards will only vest if threshold performance goals are achieved over a four-year performance period, with the payout ranging from 0% to 200% of the target number of shares subject to the PSU awards. Partner PSU Awards were granted to address increased competition for executive talent, motivate transformational performance and encourage management retention. Given the unique nature of these grants, the Compensation Committee does not intend to grant similar, special grants to the same employees during the performance period. The impact from these special awards is excluded from metrics that management uses to assess the Company's performance.

<sup>(2)</sup> The tax expense was determined based upon the nature, as well as the jurisdiction, of each Special Item at the applicable tax rate.

The Company excludes impact from Special Items for the purpose of evaluating performance internally. Special Items are not included in any of our segment results. In addition, the Company provides Adjusted EBITDA because we believe that investors and analysts may find it useful in measuring operating performance without regard to items such as equity in net earnings (losses) from equity method investments, income tax, interest income, net, investment gain or loss, depreciation and amortization, store impairment charges, and Special Items. Store impairment charges included as an adjustment item in Adjusted EBITDA primarily resulted from our semi-annual impairment evaluation of long-lived assets of individual restaurants, and additional impairment evaluation whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. If these restaurant-level assets were not impaired, depreciation of the assets would have been recorded and included in EBITDA. Therefore, store impairment charges were a non-cash item similar to depreciation and amortization of our long-lived assets of restaurants. The Company believes that investors and analyst may find it useful in measuring operating performance without regard to such non-cash item.

These adjusted measures are not intended to replace the presentation of our financial results in accordance with GAAP. Rather, the Company believes that the presentation of these adjusted measures provides additional information to investors to facilitate the comparison of past and present results, excluding those items that the Company does not believe are indicative of our ongoing operations due to their nature.

The above tables reconcile segment information, which is based on management responsibility, with our Condensed Consolidated Statements of Income.

- (1) Amounts have not been allocated to any segment for purpose of making operating decision or assessing financial performance as the transactions are deemed corporate revenues and expenses in nature.
- (2) Primarily includes revenues and associated expenses of transactions with franchisees derived from the Company's central procurement model whereby the Company centrally purchases substantially all food and paper products from suppliers and then sells and delivers to KFC and Pizza Hut restaurants, including franchisees.
